The following action is in response to the proposed amendment-after-final received May 21, 2007. The proposed amendment has been approved for entry.

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

**In line 11 of claim 1, "that," has been changed to – that --.**

The above change has been made to correct an apparent typographical error.

***Allowable Subject Matter***

Claims 1-10 are allowed. Claims 1-5, 8, 6, 7, 9 and 10 will be renumbered as claims 1-10, respectively.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: The prior art of record fails to anticipate or render obvious an electromagnetic friction clutch as defined in claim 1 wherein the permanent magnet has a magnetic force such that the

Art Unit: 3681

armature disk is pressed against the friction lining of the rotor part with a friction force which is high enough for the vehicle door to remain securely in the open position assumed when the electric coil is not energized and such that, during subsequent manual operation of the vehicle door, the frictional connection between the armature disk and the friction lining can be overcome.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Amendment***

The amendments to claims 5 and 8-10 overcome the rejection under 35 USC 112, 2<sup>nd</sup> paragraph, set forth in the previous Office action. Accordingly, the rejection is withdrawn.
